

## RECENT PROJECTS

### 1. CRANE TRUCK

We manufactured this 6.5m flat deck and fitted the palfinger 19 tonne crane.

### 2. TRANSPORTER

We reckon this purpose built transporter for Fulton Hogan looked very smart when it was completed.

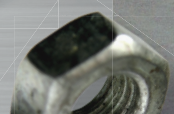

### 3. BATHTUB TIPPER

We designed and built this 4mm Hardox Steel Bathtub Tipper. This was also for Fulton Hogan.

## NEED A NUT?

We have a massive range of nuts, bolts, screws, fixings and fasteners in stock.

## BIG BOYS TOYS

We launched BroLube and Bakflip at the 2013 Big Boys Toys in Auckland. To display our products we used a CUBE built here at ten4 as a mobile showroom. The CUBE attracted as much attention as the products we were there to show.

Easily transportable, robust and weatherproof, the CUBE is ideal for touring shows or pop up store situations. For other examples of the CUBE see the Gallery and Special Projects pages on our website.

Welcome to the first edition of Heavy Metal. We'll be sending you a newsletter a couple of times each year to keep you up to date with new products and services we're offering and to let you know of any industry changes that might affect you.

For those that aren't already aware we have moved into purpose built premises in Gumdigger Place which is only about 1km from our old workshop. The new space gives us lots more room and better efficiency.

If you haven't already visited us, drop in next time you're passing.

Our workshop isn't the only thing that's grown as we are now a team of twenty.

In each newsletter we'll be profiling a member of the team and first out of the blocks is Brett Dane who has recently been made the Workshop Supervisor.

There's been lots of other changes too over the last six months and we are now agents for Bakflip folding truck bed covers, BroLube automated lubrication systems and HFM logging accessories.

We're also manufacturing a fantastic new sliding storage system called BackMate which is sure to make any tradie's life easier and lower the risk of back injury caused by loading heavy equipment in and out of your work vehicle.

For more information on any of these new products give us a call.

CHEERS, PAUL

## BACKMATE – BETTER, SAFER ACCESS

How often do you go to grab something from the back of your vehicle and you either can't find it or you have to waste time moving a pile of gear to get to what you actually need? Designed and built by the crew here at Ten4, BackMate is a sliding tray system that makes it faster and easier to load and access all the gear in the back of your vehicle.

Not only will the improved efficiency keep the boss happy, it'll tick all the boxes for your OSH team because it prevents back strain caused by lifting heavy equipment at full extension.

Just load all your gear onto the pull-out tray and when you need it the tray glides out smoothly until everything is within easy reach. Although it's light enough to operate with one hand, the BackMate system is deceptively strong and can support evenly distributed loads of up to 350kg.

It's simple to install and doesn't take long to bolt into the back of your ute, van or truck. We reckon everyone who has to lug heavy gear should have one of these. We've fitted BackMate to our own ute so give us a shout if you'd like to see it in action or for more info check out [www.ten4.co.nz](http://www.ten4.co.nz)

## INTRODUCING...

**NAME:** BRETT DANE  
**BEEN HERE:** 16 YEARS  
**POSITION:** WORKSHOP MANAGER

### BACKGROUND

I'm a Blacksmith & Springmaker by trade and that's a 5 year apprenticeship. After that I spent 10 years in metal and wrought iron making things like fancy gates, balustrades and spiral staircases. Then I went into structural steel - designing and building all the steel work for buildings. From the very beginning I worked on trucks in my own time, designing and building transporters.

I started work here in 1998 and have done a variety of jobs especially on the structural steel side of things. I was recently promoted to Workshop Manager.

### INTERESTS

I breed and show Scottish Highland Cattle around the country. In the last show we won Reserve Show Champion.

## BROLUBE AUTOMATED LUBRICATION SYSTEMS

- BroLube delivers high frequency, carefully controlled amounts of lubricant during equipment operation preventing metal to metal wear and enhancing the lifespan of your gear
- Fully automated, the BroLube system takes the guess work out of maintenance and reduces operator responsibility, grease consumption and downtime
- It's designed to deliver your choice of standard EP2 lubricants as well as oils and light liquid greases and is available for pneumatic, electric and hydraulic operated solutions from 2 to 200kg and larger
- BroLube is proven to lower the cost of ownership of transport, construction, earthworks and agricultural equipment

## BAKFLIP FOLDING TRUCK BED COVERS

Bakflip's hard cover folding truck covers have been a top seller in the States for over 30 years. We've been fans of the hard folding sectional tonneau covers ever since we first saw them and were rapt to become the NZ Distributor last year. Things we rate about the product:

- It offers easy access from either side of your truck
- Great flexibility! The cover can be partially open in transit (great for carting the dog or bikes) or use the prop and secure it in a fully open position
- Extra carry space - you can carry a load of up to 130 kilos on top of Bakflip while valuable or fragile items are stored safely under cover
- Total access to your bed. The patented hinge design pivots your Bakflip completely out of the way
- Water tight
- Simple locking system - the lock integrates with the existing tailgate lock so there are no additional keys or locks required
- Less wear and tear on your paintwork as the cover fits inside the bed and tailgate
- 1 Year Warranty

## HFM LOGGING ACCESSORIES

We have a HUGE RANGE of Logging Accessories including:

- Chains
- D Shackles
- Hammerlocks
- Lifting Hooks
- Lifting Rings
- Load Binders
- Twitchers
- Unilocks
